Nelson W. Baker Accepts Appointment As President and CEO

Vancouver, British Columbia: The Company is pleased to announce that Nelson W. Baker, P.Eng., has accepted the appointment as President and Chief Executive Officer of Mineral Mountain Resources Ltd. (www.mineralmountainresources.com). Mr. Baker is a seasoned exploration and mining professional with more than forty years of continuous experience in all facets of early-stage to advanced mineral exploration in all parts of the world.

Most recently, Mr. Baker played an important role in the discovery of the Rainy River gold deposit in northwestern Ontario. He was responsible for bringing the Rainy River Project to Rainy River Resources Ltd. in 2005, initially serving as President and CEO to June, 2009. During Mr. Baker's tenure, Rainy River's project grew from a grassroots exploration property to a project with indicated resources of 2.225 million ounces of gold and 3.375 million ounces of silver at a gold grade of 1.24 g/t as well as inferred resources of 1.807 million ounces of gold and 4.548 million ounces of silver at a gold grade of 0.88 g/t Au.

He has been active in the mineral exploration business for over 40 years, starting at age 14 as an assistant to his father, who was then prospecting at Hemlo, Ontario. He attended the Haileybury School of Mines where he received his Mining Technology Diploma (1964), followed by studies at the South Dakota School of Mines, from which he graduated with a B.Sc. in Geological Engineering (1968). He subsequently spent 14 years as a senior geologist with Esso Minerals Canada (Toronto) and another 15 years as an exploration consultant working in such well known Canadian gold mining districts as Hemlo, Red Lake, Timmins, Kirkland Lake and Casa Berardi. During this period, he was involved in the discovery and delineation of several mineral deposits in North America.

Mr. Baker has served as a geological consultant with Nelson W. Baker Geological Services Ltd., a private company, since 1984. In 2001, Mr. Baker joined Vancouver-based Hunter Dickinson Group as a mining project evaluator, working on programs in the Raglan area of Quebec and elsewhere. With the recovery in commodity markets, Mr. Baker left Hunter Dickinson in 2001 to found Rainy River Resources Ltd. (**RR.TSX-V**), where he served as a director and President and Chief Executive Officer from March 2005 to June 2009. In addition, he also serves on the boards of Temex Resources Corp. (**TME.TSX-V**), RPT Resources Ltd. (**RPT.TSX-V**), PC Gold Inc. (**PKL.TSX-V**) and Northern Rand Resource Corp. (**NRR.TSX-V**).

About Mineral Mountain

Mineral Mountain intends to become a significant explorer and developer of precious metals with a particular focus on gold and silver. Our business model is based on a strong management team and strategic partnerships. Right from the onset, our strategy has been to build an experienced, well-balanced management team with expertise in finance, business management, exploration and later mining. Our strong management has led us to an initial solid financial position with a healthy treasury allowing us to grow the Company through exploration and project acquisitions.

Our 89,000 hectare Kootenay Arc Project, situated southeast of Revelstoke, British Columbia, is quickly emerging as a high-quality, very fertile setting to host a significant polymetallic +/- precious metal deposit. This underexplored part of the Kootenay Arc is also considered to be highly prospective for sediment-hosted gold deposits similar to those found in the Carlin Trend of Nevada.

This release includes certain statements that may be deemed to be "forward-looking statements". All statements in this release, other than statements of historical facts, that address events or developments that the Company expects to occur, are forward looking statements. Forward looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects", "plans", "could" or "should" occur. Although the Company believes the expectations expressed in such forward looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from those in forward looking statements. Factors that cause the actual results to differ materially from those in forwardlooking

statements include gold prices, results of exploration and development activities, regulatory changes, defects in title, availability of materials and equipment, timeliness of government approvals, continued availability of capital and financing and general economic, market or business conditions. The Company cautions the foregoing list of important factors is not exhaustive. Investors and others who base themselves on the Company's forward-looking statements should carefully consider the above factors as well as the uncertainties they represent and the risk they entail. The Company believes that the expectations reflected in those forward-looking statements are reasonable, but no assurance can be given that these expectations will prove to be correct.
